

- Automatic Base Station
- 3 x powerful LED torches
- Each torch has generator
- Station keeps torches charged
- Audio alert
- Automatic floodlight
- EU / BS mains adapter
- Recycled packaging

SPECIFICATIONS	
Product Code	VIP7360
Base Station	<ul style="list-style-type: none"> • Digital controller provides charge to torches when need, but saves power once torches have charged • Auto floodlight & audible alert in the event of power cut
3 x Mini Pro Torches	<ul style="list-style-type: none"> • Each torch has 5 hours light capacity • Built-in Ventus Induction Generator provides a further 30 minutes light for each 1 minute wound • Torches are weather proof and suitable for indoors & outdoors use
Power cut audio alert	Outputs beeping sound to aid location. User can cancel alert manually, or auto cancels after 5 minutes
Power cut emergency flood light	2 x LED floodlight illuminates floor area in front for up to 90 minutes without power
Station dimensions	180 x 130 x 75 mm
Torch dimensions	135 x 46 x 46 mm
Certificated	CE / ROHS / WEEE

Triple Torch Safety Station

What is the VENTUS Difference?

(Compared to budget windups)

- **Double the power, half the winding up effort!**

New contact-less generator technology using Neodymium magnets offers DOUBLE the power output compared with budget brands. That means longer run time for less effort. (ie 30 minutes light for 1 minute winding, compared to typical 10 - 15 minutes).
- **Vastly brighter light!**

The use of more expensive InGaN LED's ensures Super Bright performance with minimal power consumption. More than FIVE TIMES the light output compared with many budget models. Instantly see the difference!
- **Longer run time!**

The use of higher capacity Lithium internal batteries ensure superior duration. For example, provides over FIVE HOURS of constant light, compared with typical budget performances of around 20 minutes!
- **Greater convenience!**

Features fully automated operation. Fit-and-forget technology keeps your Mini Pro Torches fully charged and ready to go.

with
three self-powered torches

● Environmental Care!

All products are Retail Packaged in eye-catching, but eco-friendly formats. No more clamshells or full blisters! Just good, simple cartons made from recycled pulp with the minimum possible, but recyclable, plastic windows.

● Built to last!

Designed for total Customer Satisfaction. For example:-

- > Rugged rubberised finish to all surfaces to ensure a firm and comfortable grip.
- > High quality LED lamps tested to over 100,000 hours lifecycle.
- > Advanced contact-less generator system has only ONE moving part, and NO wearable components, thus ensuring extremely rugged and durable lifecycle.
- > Made to last! Thick and solid body made from impact resistant and fully recyclable ABS, Winding Handle made from glass fibre reinforced Nylon. Inter-meshing generator gears manufactured from dissimilar polymers provide long life and smooth operation.

ADVANCED CONTACTLESS 3-PHASE GENERATOR PROVIDES DOUBLE THE SHINE-TIME PER MINUTE OF WINDING

INDUSTRIAL GRADE COMPONENTS THROUGHOUT - ENSURE LONG AND HIGHLY RELIABLE SERVICE LIFE
