Product Description

SuperLite is re-chargeable portable lighting product which is a powerful flashlight and is capable of mobile device power charging. Suitable for Automobile emergency lighting, camping, field search and rescue, field inspections, night fishing, home blackout emergency lighting and other purposes as well as being an essential safety tool for vehicle users.

Product Technical Specifications

- Battery Specifications: UL certified lithium battery, Capacity: 2200mAh
- LED power: CREE XPE 3W bright LED lamp beads, 220lm, flashlight illumination distance: 200 meters plus
- Portable lighting function: uses patented technology and special diffusion material, soft light, 360-degree
It can be switched with FIVE ranges, bright light, medium light, dim light, SOS and strobe when you press the power button.
Bright light (100%): lighting duration 3hrs plus
Light (50%): lighting duration 6hrs plus
Low (15%): lighting duration 24hrs plus
- Portable power charging function: Highly efficient safety module, can charge power to mini-watt electronic devices such as: iPhone, iPad, Smart Phones, MP4 etc...by simply plugging in any USB style phone charger. A phone charge cable has also been provided with a 3.5mm Nokia adapter which allows additional phone charger tips to be added. * For a full range of additional phone charger tips, please visit www.ventusfreeenergy.com. Charging voltage/current: 5V/1000mA
- Uses advanced constant current control technologies, provides consistent brightness, is durable, and suitable for a variety of high-temperature, low temperature environments, particularly suitable for automotive and outdoor environments due to its rain proof construction.
- USB direct charge function, you can use a car, computer or regular phone charger USB Interface for charging SuperLite. Charging voltage / current: 5V/700mA
- The shell is made of aircraft-grade aluminium, with anodic oxidation treatment, wear-resistant anti corrosion.
- The unit is manufactured using high strength steel alloy. It is so strong you can use it as an emergency window breaker for a car window if necessary.

Battery Charging Advise:

The rechargeable battery is removable and replaceable.
This product uses a state-of-the-art switching power supply design, constant voltage constant current mode. Overload, short circuit, battery positive / negative polarity reverse protection function.

The product comes complete with its own integrated charging interface via a USB cable. It can be charged in your car, home or using your computer.
Charging indicator light. Red when charging, green when fully charged.
It is not necessary to remove the battery for charging, simply attached the supplied USB lead to any USB socket.

Other devices maybe charged from SuperLite:

If your smart phone uses a USB cable, simply attached the USB cable to SuperLite.
Other phones can be charge by the supplied mobile charging cable *. Used for portable power for Emergency charging.

NOTE: If the product is not in use for a long time: complete a single charge of the battery every six months, in order to prevent damage caused by excessive depletion of the battery.
